Fusick Automotive has been serving the Oldsmobile enthusiast for over 50 years. We constantly strive to bring you the hard to find parts you need to restore your Oldsmobile. We have invested in well over 1200 tools used to bring non-existent parts back to the marketplace. We want you, the Oldsmobile enthusiast, to have as many parts available as other popular makes. Look for our  logo throughout the catalog indicating items that we manufacture for Oldsmobile. We are participants in the GM licensing program.

We continue to provide in house rebuilding service for 1941-58 Heater Control Valves and 1949-58 Trico Windshield Wiper Motors. Other services include 1952-60 Power Steering Pumps, 1953-60 Harmonic Balancers, 1930's-1954 Knee Action Shock Absorbers, 1949-60 Carburetor rebuild service, 1936-60 A/C single and dual action Fuel Pumps, 1940-60 Generators and Starters, 1953-60 12 volt Horn Assemblies, 1950-60 Heater Cores, and 1949-60 Vacuum Advances.

The uncertainty and spiraling costs of raw materials, labor, and out-of-control freight charges have necessitated price increases in this catalog. These increases only reflect newly increased goods occurring within the last months.

We consistently maintain a large inventory of parts in order to offer prompt shipping; 97% of all orders are shipped within 24-48 hours. We look forward to assisting with your Oldsmobile restoration in the near future. We also have a catalog for 1961-77 Cutlass-442-Hurst/Olds, and a catalog for 1961-75 88-98-Starfire-Toronado owners. As always, catalogs are available free with order.

Sincerely for Oldsmobile,

**1954-60 Carpet Sets:** Oldsmobile used varying weaves of carpeting for 1954-60 models. 1954-57 models have a cut and sewn Daytona weave which is a tight nylon loop design with foam backing. Some original types of carpeting for 1958 models are no longer available, however, we can substitute a cut and sewn 80/20 Loop carpet with matching heel pad and edging. 1959 Dynamic 88 and Super 88 as well as most 1960 models used a molded Tuxedo carpet, which is the appropriate color loop carpet with Black strands interwoven into carpeting. The 80/20 loop carpeting is available as a replacement for All 1954-58 cut and sewn or 1959-60 molded applications. Carpet samples are available upon request and colors must be approved by customer prior to ordering carpet sets.

## Hood Insulation

One inch thick Gray hood insulation used on 1952-60 Oldsmobiles. All Pads are die cut with original configuration. Some Hood Pads are held in place by the hood tie bars, while others are glued in place. For Pads requiring glue, we suggest 3M #80 Spray Adhesive available at local parts stores. **Rough side of hood insulation always faces engine, smooth side is glued to hood.**

# TRUNK COMPARTMENT

We have reproduced the Brown Chain-Linked Material used on most 1946-56 Oldsmobiles. Some 1955-56 models used different colors such as Green, Tan, Blue or Gray, however there are no plans to offer these colors. Samples of the trunk material and trunk cardboard are available at no charge. Although 1946-56 Brown Trunk Cardboard varied in color, we have only one shade available. Trunk material will require sewing and in some cases the material must be sewn to the cardboard. We recommend a trim shop for this type of work.

**Brown Chain-Linked Trunk Material:** Tan material with a Dark Brown chainlink pattern for most 1946-56 Models. The Dark Brown pattern closely matches the brown used on the trunk cardboards. Sold by the linear yard; approximately 56" X 36". Most models use 3-1/2 yards.

## 4-Door Hardtop (no center pillar) Roof Rail Weatherstrip

Oldsmobile introduced the 4-Door Hardtop or Holiday Sedan in 1955. We have all applications available for this body style through 1960. The 1955-56 Holiday Sedan uses a very complex, expensive roof rail weatherstrip with a metal insert. We also offer an economy straight extrusion, which you can glue to your old metal core, if desired (please note that this is a difficult, cumbersome process).

## Molded Door Weatherstrip

1949-60 Door Weatherstrips are available as tab inserted (where applicable) sponge rubber with molded ends and corners. Holiday Sedan models are 4-Door Hardtops, Sedan models are 2-and 4-Door post and Holiday Coupe is a 2-Door Hardtop (no post). See diagrams inside back cover for body styles. The price of these weatherstrips reflects the complexity of the molded ends and corners.

# MECHANICAL REBUILDING SERVICES

We offer rebuilding services on these increasingly difficult to locate primary mechanical parts. All individual services require that your existing part or parts (commonly called cores) be shipped complete and unaltered for rebuilding. If you do not send a core in advance, we will require a core charge. Please do not disassemble old units. Cores with missing or broken parts will be assessed a deduction toward core refund or rejected and returned.

**1937-60 Water Pumps:** All water pumps are shipped with a new gasket. New reproduction water pumps available for 1949-60 Oldsmobiles without A/C; all other applications are rebuilt units. **Core charge for all rebuilt water pumps is 250.00.**

# 1949-58 OLDSMOBILE FUEL TANKS

We are proud to announce the availability of new 1949-58 Oldsmobile Fuel Tanks. These are not universal tanks but made specifically for the models below. Many hours of research and development have been applied and the fuel tanks are manufactured exclusively for us using our own tooling dies. Shipping charges for the tanks are expensive and therefore require a shipping surcharge. Cutting the Fuel Tank Neck on 1949-57 Gas Tanks will slightly lower the shipping charges. Please contact us for details.

**1949-50 Oldsmobile Fuel Tank:** 18-Gallon Tank fits 1949 Oldsmobile 76-88 models with gas feed pipe in sending unit, 1950 All 76-88-98 models and 1951 88A models. Note: Can fit 1949 76-88 models with the feed pipe in tank, but you will need to change your fuel line and sending unit. 1949 98 models have the same requirements but we are unsure of the neck configuration.

490FT Fuel Tank does not work for 1949-50 76-88 Station Wagons.

**1954-55 and 1956 Oldsmobile Fuel Tanks:** 20-Gallon capacity Tank for All 1954-56 Oldsmobile models. Note: We used the 1956 Fuel Tank as our manufacturing example. When examining the 1954-55 tanks versus the 1956 tank, we found both sides of the 1956 tank to be depressed on an angular plain. This is to accept the optional dual exhaust systems available on 1956 Oldsmobiles. The original 1954-55 tank has only one side depression since factory dual exhaust was not offered in those years. This new fuel tank allows installation of dual exhaust on your 1954 or 1955 with the proper clearance.

Technical note: Use grease when installing GFH57 hose, making it much easier to adjust the extension. The HC578 clamps are a custom manufacture from Murray Clamp and are correct for 1957 Oldsmobiles.

**1958 Oldsmobile Fuel Tank:** The 1958 Oldsmobile used a one piece neck and tank assembly from the factory. Shipping for each tank would require truck freight at a cost of 350.00 plus because of the long necks on both the 88 and 98 models. The new two-piece tanks can be shipped by conventional carriers such as FedEx. We offer the 1958 Fuel Tank in the same principal as the 1957 Tanks using filler neck extensions. 1958 88-Super 88 have different necks from the 98 models. The 1958 Fuel Tank Packages are sold with the Fuel Tank, Fuel Tank Neck Extension and Connecting Hose with the proper clamps. Fuel tank has a 20-gallon capacity.

**Power Brake Booster Rebuilding Service:** Rebuilt Power Brake Boosters/Master Cylinder combination for 1953-60 Bendix and Moraine units. Oldsmobile used two different suppliers for Brake Boosters in the 50's. The Bendix unit has an aluminum master cylinder while the Moraine uses a cast steel master cylinder. Please check your original units carefully before ordering. \*1957 units had a first and second design; 1st type uses a rubber hose at master cylinder; 2nd type uses a steel line. Prices listed below are for a basic rebuild service; there are additional charges for re-sleeving and master cylinder replacement if needed.

**Core charge on all boosters is 325.00.**

**Please Read:** A rebuilt Power Brake Unit will not always guarantee a solution to your problem. Other areas to check are a lack of vacuum caused by a bad check valve or a pin hole in the vacuum reserve tank. Air in the brake lines, deteriorated vacuum hoses or poorly functioning wheel cylinders are areas of concern as well. NEVER use silicone brake fluid.

### 1953-59 Bendix Power Brake Master Cylinder Housing:

# 1946-56 HYDRAMATIC AND 1956-60 JETAWAY TRANSMISSION REBUILD KITS

The 1951 Kits are different than other years and are available as a special order only. Rebuilding kits are sold two ways; the Overhaul Kits contain all gaskets, rubber, sealing rings and metal clad seals. The Master Kits contain everything included in the Overhaul Kits with the addition of the frictions and steel plates. The bushing kits, washer kits and transmission bands are sold separately. They are not included with Master Kits or Overhaul Kits. The transmission bands for 1946-56 Hydramatics are sold as an exchange only, requiring your original cores in advance. Please allow 2-3 weeks for this service.

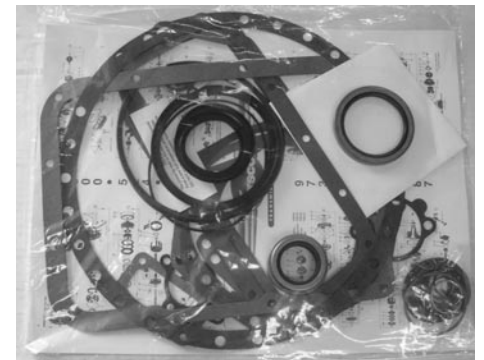

**\*Special note:** Some 1956 models used either a Hydramatic or a Jetaway Transmission. The Hydramatic did not have 'PARK'; this transmission utilized 'REVERSE' for the park gear. The 1956 Jetaway Transmission had a separate 'PARK' gear.

We have a limited supply of White over Tan Pinpoint Grain Rayon Convertible Top and Top Boot Material used on 1953 Oldsmobile Fiesta and some 1954 models. About 28 years ago we ordered the material from Haartz Corp. in Acton, MA who made the fabric originally for General Motors. Cost for the material is \$75.00 per yard and samples are available. We may also have a small amount of material for the top pads as well as an extra custom sewn White Convertible Top Boot for 1953 Fiesta, cost on top boot 650.00
